#### **Crockett Facilities Services Selected for “ENR Top 600 Specialty Contractors List”**

**BOWIE, MD** (October 21, 2013) — [Crockett Facilities Services, Inc. \(CFSI\)](#), a leading provider of building operations and maintenance, mechanical contracting and HVAC services to government and commercial clients, announced it has been included in *Engineering News-Record's* 2013 [Top 600 Specialty Contractors list](#), ranked at number 456. The list appeared in the October 14, 2013 issue of ENR, published by McGraw-Hill Companies Inc. ENR publishes this list each year based upon annual revenues of specialty contractors across the United States.

According to ENR, specialty contractors finally see signs of growth in their markets but worry politics may derail the recovery. Many specialty contractors believe the market will continue to recover over the long term, but say the recovery would be more robust if federal policies were more certain.

*“Crockett Facilities Services continues to grow both in the commercial and government sectors,”* said Mark Crockett, vice president of CFSI. *“We were recently awarded a multi-year complete facilities maintenance contract for a courthouse in Virginia, and are expanding our footprint with property management companies with our HVAC preventive maintenance contracts. It is our commitment to help our customers increase their property value and lower overall operating costs.”*

In 2013, CFSI also was named to the *Washington Business Journal's* list of top ten mechanical contractors and the top 25 women-owned businesses list, as well as the Inc. 5000 list of fastest-growing private companies in America by *Inc. magazine*.

#### **About Crockett Facilities Services, Inc.**

Crockett Facilities Services, Inc. (CFSI), a woman-owned mechanical contractor, delivers building operations and maintenance, mechanical contracting, and heating and air conditioning services to commercial and government clients. CFSI's preventive maintenance programs, encompassing mechanical, electrical, energy management and HVAC services, help business owners, property managers, and data center /IT managers to reduce energy costs, extend equipment life, maintain tenant comfort, and decrease downtime.
